

Call for applications for the JOUSSOT-DUBIEN AWARD 2018

in collaboration with ArianeGroup

IN BRIEF:

// AMOUNT OF THE AWARD: 10 000 euros

// WHO CAN APPLY: Foreign students currently studying outside of France and having already obtained a bachelor level in Chemistry (Physical-Chemistry, Materials Science, Polymers, Analytical Chemistry) or Food Science.

// DEADLINE: May 1st 2018

// STARTING DATE OF STUDIES: September 2018

// PLACE OF STUDIES: ENSCBP - Bordeaux INP Bordeaux, France

DETAILS:

The **Graduate School of Engineering for Chemistry, Biology and Physics** in Bordeaux (ENSCBP- Bordeaux INP), which is part of Bordeaux INP, in collaboration with ArianeGroup, world leader in space industry, is publishing its annual call for applications for the Jousot-Dubien award. We are seeking candidates with an excellent curriculum and who are currently studying Chemistry or Food Science in a country other than France. The award of 10 000 euros should help them to cover their living costs during their studies at ENSCBP- Bordeaux INP. The candidate's level of education should correspond to a bachelor degree or higher. They can enter our graduate school at the 4th or 5th year level of higher education.

Apply to the award and to one of our degrees

	MSc	CHEMISTRY - PHYSICS	FOOD SCIENCE
DESCRIPTION	Bordeaux INP diploma (master level) Three programs available: -Applied Formulation of Polymers and Colloids -Inorganic Materials Design and Processing -Micro-and Nanotechnology	Engineer program (master degree) Materials, energy, polymers, environment, quality	Engineer program (master degree) Lipids, innovative nutrition, production, quality assurance
DURATION	12 months Sept 2018 to Sept 2019	24 months Sept 2018 to Sept 2020	24 months Sept 2018 to Sept 2020
LANGUAGE OF INSTRUCTION	English	French and English	French

The application should be composed of:

- a curriculum vitae
- a certificate attesting their current level of education
- a list of subjects studied so far, including obtained marks
- a recommendation letter from one member of their faculty
- a short motivation letter

Application before May 1st 2018 on line : <https://enscbp.bordeaux-inp.fr/fr/prix-joussot-dubien>

ABOUT THE JOUSSOT-DUBIEN AWARD

This award has been created to honor the life of Professor Jacques Jousot-Dubien (1928-2009), director of ENSCBP - Bordeaux INP from 1982 to 1986 in recognition of his very important impact on the future development of the graduate school as well as his actions in favor of international scientific exchanges. He was not only the key figure in establishing a graduate school closely connecting Chemistry and Physics, but also an outstanding scientist with the highest national and international recognition especially in the field of photochemistry. Having himself performed a large part of his studies abroad (Bachelor of Science in Chemistry at Swarthmore College, Pennsylvania in 1949, followed later by a post-doc at the Brooklyn Polytechnic Institute, New York) he was always very open for hosting foreign students either at the graduate school or in his research laboratory. It is therefore more than natural that this award carries his name and will in this way contribute to keep alive the memory of an exceptional person.

arianeGROUP

ArianeGroup is proud to support the Jousot-Dubien award as a demonstration that international scientific and technologic exchanges are key elements for innovations and breakthroughs for future industrial applications.

ArianeGroup is investing in a long term view with top scientific teams and high level schools such as ENSCBP - Bordeaux INP to prepare future engineers to shape the future of access to space.
